

Deploy Network Security Groups

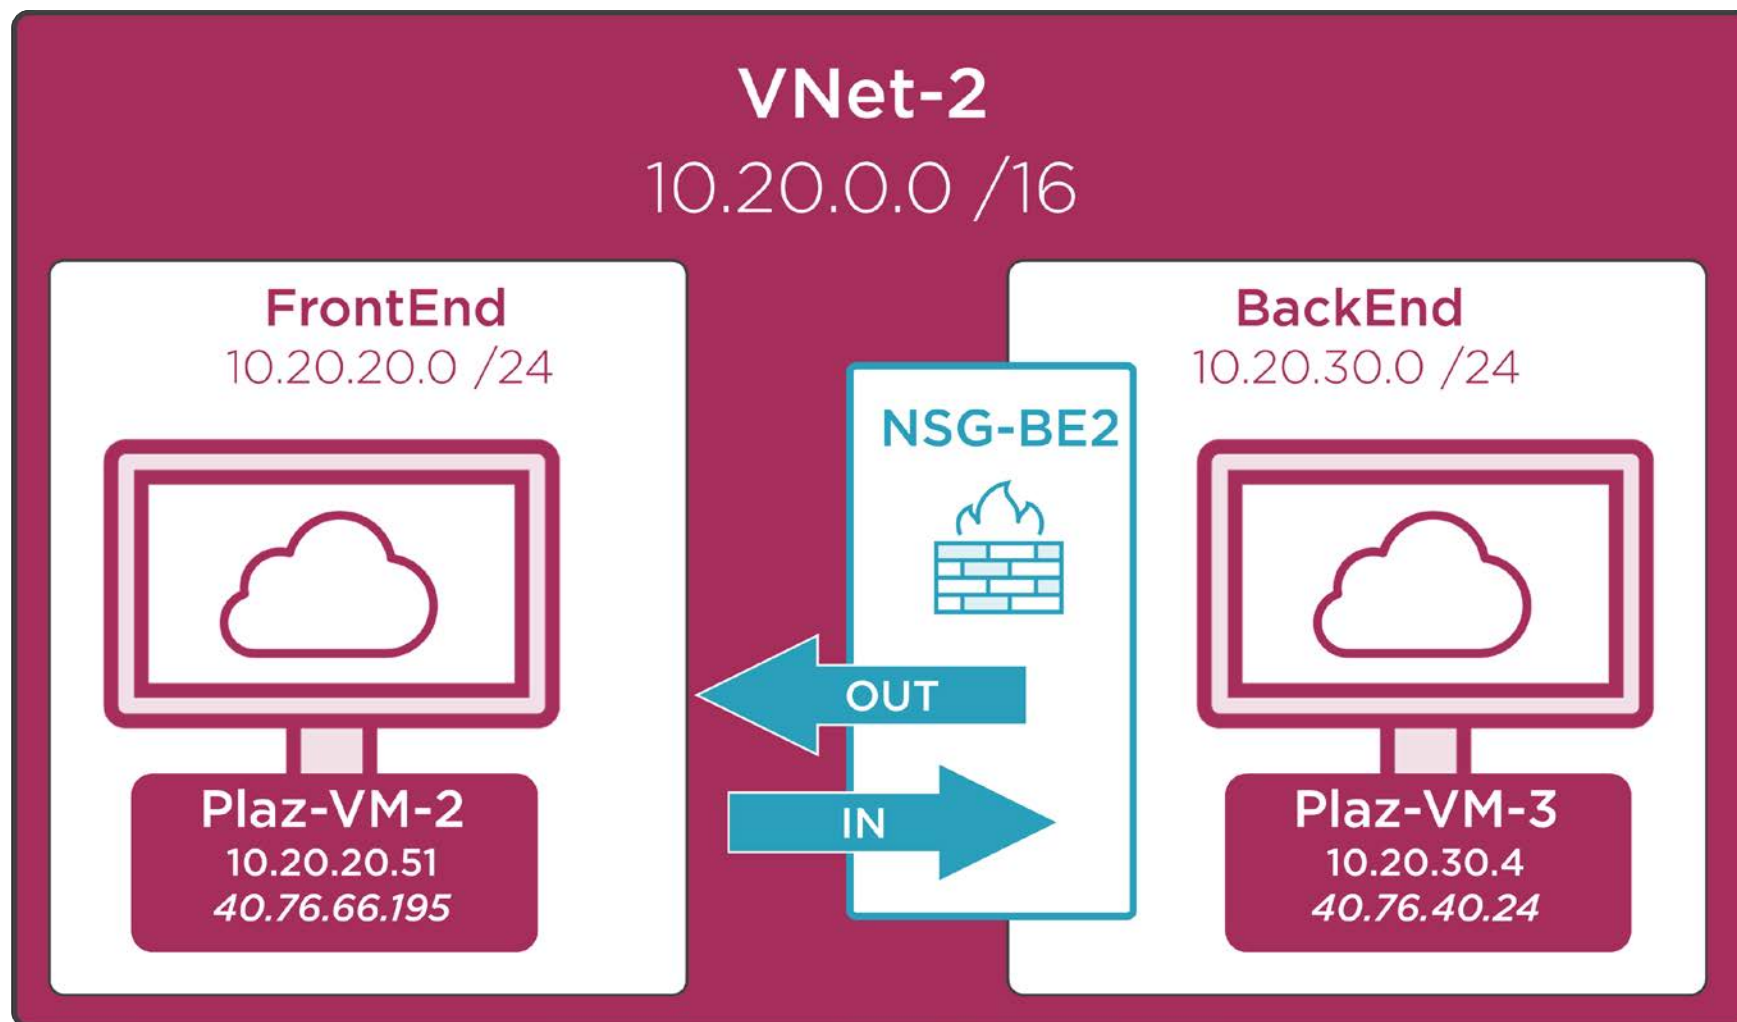

Gary Grudzinskas

AZURE ENGINEER

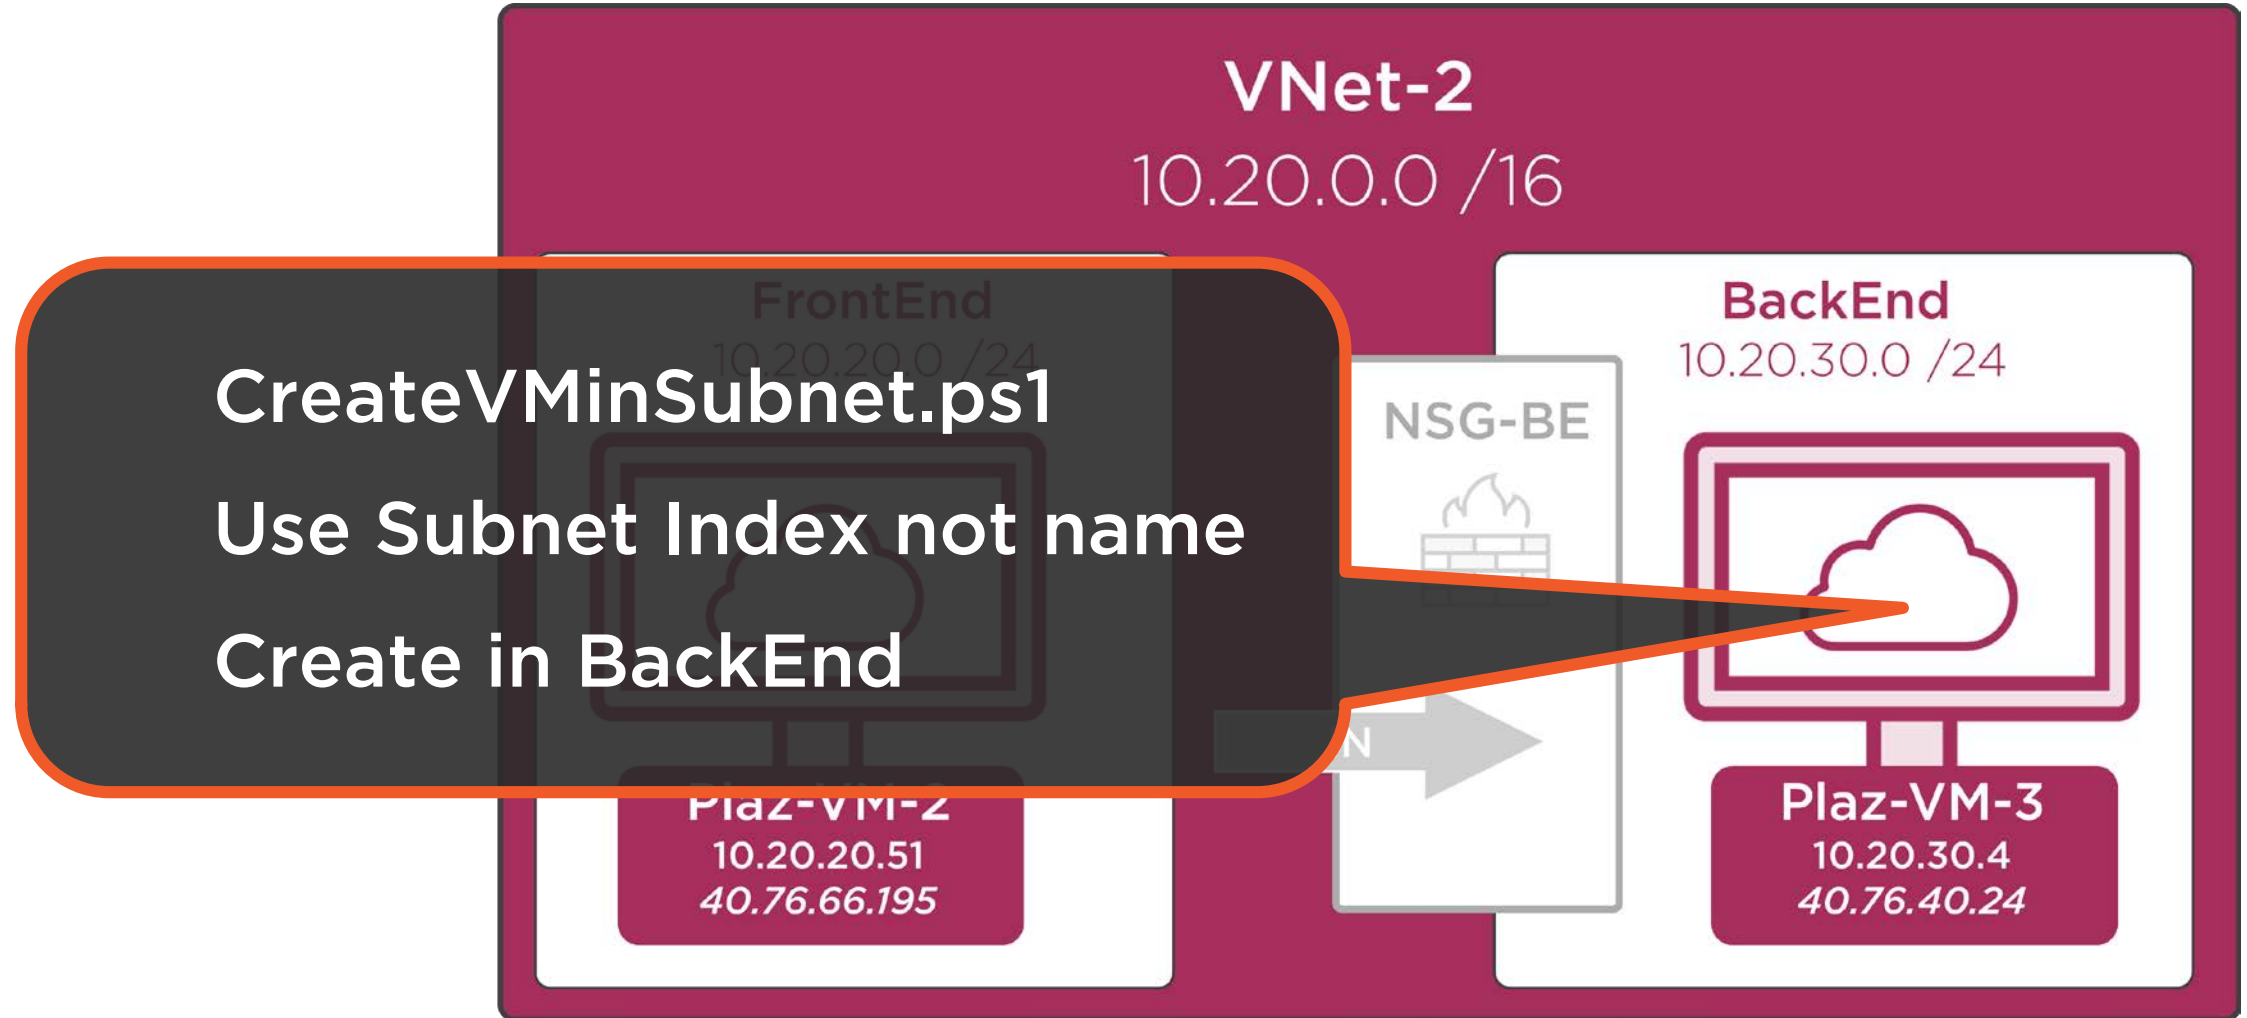

@garygrudzinskas

3: Deploy Network Security Groups

Create Plaz-VM-3 with PowerShell

Create Network Security Group NSG-BE

NSG is like a firewall

Create Inbound Rule for the BackEnd

Isolate traffic from FrontEnd to BackEnd

Associate with an interface or a subnet

VNet-2
10.20.0.0 /16

BackEnd
10.20.30.0 /24

NSG-BE

IN

Plaz-VM-3
10.20.30.4
40.76.40.24

Create NSG-BE2 with PowerShell

SetNSGBE.ps1

**Outbound Rule
for Internet**

**Inbound Rule to
limit port traffic**
